Residuo Zero and the Sustainability

OUR FACTORY | WAY OF WORKING

Residuo Zero: the inbound of raw materials for R0 is located in different space compared to the conventional. Regarding, the R0 production process, as of today for baby leaf, is divided by conventional temporally

OUR FACTORY | NUMBERS

-  **7.000 mq** cooled processing departments
-  **4 washing lines** with 3 tanks each one
-  **3 tunnels for drying (Baby Leaf)**
-  **Optical Machines** on each washing line, for foreign body's detection
-  **10 packaging lines**
-  **80 colleagues** in the factory
-  **2 working shifts**
-  **Certification:**

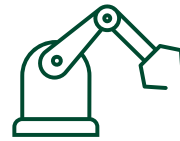

Belgravia

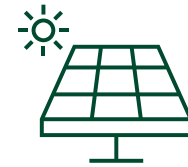

OUR FACTORY | PROJECTS

**Enlargement of
the factory
(2023-2025)**

**Installation of
machinery 4.0 and
robot at the
packaging line (2022-
2025)**

**Installation of
photovoltaic panels
in all the platforms
(2022-2024)**

Residuo Zero and the sustainability

RESIDUO ZERO and THE SUSTAINABILITY

WHAT RESIDUO ZERO IS

Our baby leaf (lamb lettuce, baby spinach, green and red batavia, mix salad – baby leaf) are without pesticide residue (< 0,01 mg/kg) at the harvesting and, thus, at the consumption.

Since 2021, we are the 1° European Company to be certified residuo zero for the baby leaf from DNV certifiers, using the most restrictive parameters.

Belgravia

FEATURES

The study and use of sophisticated agronomic techniques allow:

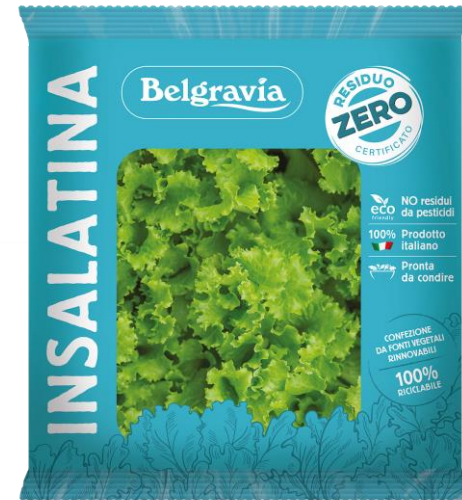

- **no use of pesticide, only in few cases they can be used as long as residues < 0,01 mg/kg**
- **reduction of water and energy waste (-30%)**
- **varietal selection of seeds**
- **digital control in the field**
- **increase in laboratory analysis (+20%)**
- **separated and dedicated management of the product in the field and in the factory**
